The two American ships-of-war in Alexandria harbor were anchored not in a safe place, but in a good position to observe the fight between the British fleet and the Egyptian forts. Thus comfortably fixed the commander of this section of the navy which survived Robeson's cupidity, not wishing to be disturbed, notified the commander of the Egyptian forces that if his ships were fired upon he would return the fire. It never entered the mind of this officer that his ships had by right no place within range of the Egyptian guns, and that representing a neutral power he should be a looker-on at a safe distance. He was imbued with the spirit of the occasion and was "spoiling" for a fight.

The Tunez correst onders at Alexandria, describing yesterday's bombardment, particularly mentions the deadly effect of the electric broadside from the ships which attacked the Pharos and Ras El Teen forts. There are four candidates for governor in the field. William P. Bale is the candidate of the Democratic party; Joseph H. Fussell is the candidate of the bolting Democrats; Governor Hawkins is the Republican caudidate for re-election, and J. R. Beasley is Etheridge in the field as their candidate, notwithstanding the bolting Democrats have made a bid for their votes by indorsing the four-mile law. The canvass, it is predicted, will be bitter on all sides. The fanatics on the temperance question will make a strong and earnest appeal to the religious element in the State and the Greenbackers will pander to the repudiators. Between the bolters and the Democrats the war will be waged with the bitterness and intensity usual when brothers fall out, and the Republicans will take advantage of the feud to push their fortunes. WILL ARABI'S EGYPTIANS FIGHT.

Alexandria correspondence of the Times, June 221: The following remarks, which were made by an Egyptian of high position, but never in office, are, perhaps, worth quoting: "Your statesmen and newspapers all make the mistake of trying to ascertain the views of the people and of allowing their ideas of such views to influence them. There are only two parties in Egypt—the one consists of ragamutfios, who desire any sort of disturbance in the hope of getting something out of it; the other consists of all the rest, who wish to avoid disturbance for fear of losing what they have. B-youd this, no party or political view exists in Egypt. As for Tewfik, Arabi, Halim, Ismail, no Egyptian cares a pisstre for any of them. The one party will support any one of them if a disturbance can be thereby brought about; the other will support any one in order to obtain peace. No solution will please the one party; any solution will please the one party; any solution will please the one party; that is a third party." He said: "That is very nearly true, but not quite; with a little more time given him it might be entirely true. By continually relying on them, and appealing to them, he is gradually creating an esprit de corps, which every day grows stronger. Still, even now there are very few who would be faithful to him if they had any harder work than marching through Alexandria to do." "Would they fight for him?" I asked. "Yes, with women and children, but not with half their number of armed men. Near Sennasr, on the and children, but not with half their num-ber of armed men. Near Sennaar, on the Nile, 1500 of them, armed with Remington

Alle, 1000 of them, armed with Remington rifles, met less than 2000 followers of the false prophet, armed with Bedouin guns, sticks and knives. They were led up in firm order. They fired one volley, took the rifles by the barrels, flung them into the crowd and bolted."
